TOPIC INTRODUCTION

As we move into field season, many stream management planning processes are trying to push on through these uncertain times. This peer call will bring SMP leads together to discuss the challenges and opportunities of planning during the pandemic. You will learn how your peers are adapting their stakeholder processes and how they have revamped their approach to field work for data assessments. We'll also model the best practices for online meetings.

ANTICIPATED OUTCOMES

- Connection, learning, and problem-solving with your peers around adapting stream management planning processes in the midst of a pandemic.
- Participate in a real-time lesson about online meeting best practices.
- Continuing to build a community of practice among SMP leaders, developing relationships and learning to collectively enhance work on SMP/WMPs throughout the state.
